

## **IDCUBEPRO PC INSTALLATION AND STARTING**

Minimum Hardware Requirements:

- Windows Operating System (7/10)
- Intel Core i7 CPU
- 16 GB RAM

#### Software:

- Microsoft Office
- Acrobat Reader
- Google Chrome or other web browsers

# Installation:

## Step 1.

Using a provided link, download a single executable file with the software. In most cases You can find the downloaded file in your Download directory.

## Step 2.

If you have previos versions of the software, uninstall it form the Windows Start menu. Alternatively you can save in a new directory. In that case uninstallation is not required.

## Step 3.

Make sure you have administrator rights to install the software. You will be prompted with the screen below. Click "**More info**" and then the "**Run Anyway**" button.

#### Step 4:

Click Next to the popup window informing you about the software installed.

#### Step 5:

Select the IDCube installation folder. Default installation folder is recommended. If you want to install to some other location, click browse and select the new installation folder. Check the box "Add a shortcut to the desktop". Then, click Next.

📄 readme	8/13/2024 11:58 PM	Text Document	2 KB	
splash	2/23/2021 4:17 PM	PNG File	50 KB	

A set of screens will appear loading the software.

# Step 2.

For the first time you will need to add you license key

Your license key will be saved in the installation folder or desktop and integrated.

In some cases, the license key cannot be saved due to restrictions of your admin rights.

In that case, you can open Notepad as an administrator and repeat the last step. If that does not work, open Notepad, paste you license key and save into the installation folder as *IDCube\_License.txt* file.

In the case it does not work: you might have a message like this:

# HSpeQ

In that case, delete *IDCube\_License.txt file*, open Notepad and paste your license key. Then save your file as *IDCube\_License.txt* in the installation directory.

If none of these steps work you will have to manually activate the software every time. It will not affect the performance of the software.

If you are successful and the license key is recognized, you will see the following screen with IDCubePro ready to use.
